NeoXam Portal

Leverage information turning data into insight: NeoXam portal offers efficient and smart data visualisation and reporting ecosystem with the required mobility

Just as investment success is measured in gains and losses, investor confidence in your organization is influenced by business monitoring capability, timeliness and quality of the reports your clients receive. Too much dependence on paper-based reporting and too little application of available technology can detract from your image as an industry leader one who understands and embraces the requirements of investors who must make timely decisions based on the accuracy, timeliness and ease of use of information and reports you provide.

In light of the financial services industry's soaring demand for timely and transparent information availability and reporting, the accuracy and speed of your own reporting capability can be a key challenge – and key differentiator – for your business.

Increasingly, online data visualization and reporting are becoming another "must" for asset servicers to have in their service offering.

Persistent Challenges Require Innovative Solutions

With pressures for greater accounting transparency at all time highs, asset managers must quickly master differences in language and accounting standards across different time zones, while responding to the demand for more timely and customized reports that address the myriad distinctions among complex financial instruments.

To succeed in this new world of financial reporting, you know that your organization must shift, from providing just "the basics" to offering leading edge reporting solutions geared to fill critical communications gaps that can occur when sudden financial news shock waves are generated.

NeoXam

Fully Integrated Portfolio Management Solution

HELP YOU MANAGE YOUR PROCESSES

NeoXam Density is a single solution to cover the entire Front-to-Back value chain.

REDUCE YOUR TCO
TOTAL COST OF OWNERSHIP

Our solution is fully STP (Straight-Through-Processing), from order simulation to trade accounting, covering Front-to-Back requirements.

HELP YOU MANAGE REGULATORY REQUIREMENTS

Our solutions encompass very powerful compliance engines which enable you to have a smart and comprehensive control of exposures and risks inherited from financial market, opened positions.

MANAGED UPGRADE SERVICE FOR AVANTGARD TREASURY

Managed Services overview

In today's marketplace, corporations and complex financial institutions also face a range of common challenges: pressure to generate higher returns with lower costs, increase levels of integration, reduce complexity, increase efficiency, reduce waste, and lower risk. Increased demand on operations results, in resource constraints on the IT and business teams and as internal IT budgets shrink this is only going to get worse. As a result the business wants to focus on their core value-added work and have service providers take on the non-core activities around a core set of identified information systems. In order to solve these business problems, Sungard Avantgard offers a variety of Managed Services for Avantgard Treasury customers.

What is the Managed Upgrade Service?

Upgrades are a regular part of maximizing your investment in Sungard Technology. The Managed Upgrade Service provides a mechanism to pre-define and manage application upgrade spend as a monthly rate based on a one-time fee, while enabling you to stay current with each new release of Sungard's Avantgard Treasury solution. By Sungard performing these upgrade activities and budgeting them in advance, any risk associated with upgrade projects is mitigated. The scope of each customer's unique upgrade requirements are identified up front and a predictable monthly fee is agreed for a 10 month service term. Upgrade planning, execution, testing and handover are undertaken in

collaboration with our customer stakeholders via the Sungard Avantgard Service Delivery team to ensure a seamless upgrade experience is delivered.

Business and commercial benefits

- Minimizes the dependency on costly internal IT support and administrative resources
- Remain operationally aligned with Sungard's Software Development Release Road Maps
- Timeliness in the provisioning of new features/functionality to support business expansion and growth
- Increased regulatory, risk management, audit, control and compliance adherence
- Divesting of any non-value-added tasks to be able to focus on strategic activities that are core to the business
- Removal of operational risk through the use of a ring-fenced, dedicated services team comprised of trained technical and functional experts
- Enhanced service quality due to focus under a single supplier model
- Keeping pace with innovation in technology, process and operations
- Transparency over the timing and execution of upgrades
- Lower and predictable operating costs

Fig 1: IT budget allocation today and two years from today, by development type.

Development Type	Today	2 years from today
Public cloud	14.5%	15.1%
Private/public hybrid	14.4%	22.6%
Hybrid and cloud native	15.7%	16.4%
Traditional IT services	23.4%	32.3%

Fig 2: Many organizations feel in-house IT skills could be better deployed...

Category	Percentage
Building to meet customer facing risks	14%
Building to meet regulatory requirements	25%
Building to meet operational requirements	39%
Building to meet compliance requirements	47%

SUNGARD'S ADAPTIV

Sungard's Adaptiv provides enterprise-wide credit and market risk management and operations solutions for financial services institutions. Adaptiv assists institutions of varying size and complexity to deploy technology to meet both internal and regulatory requirements for risk management and operational control. Adaptiv helps financial services institutions from the banking, hedge fund, asset management, insurance and corporate sectors with its deep understanding of risk management and operational processes.

PROTEGENT COMPLIANCE

PROTEGENT COMPLIANCE PLATFORM OVERVIEW

Regulatory pressure cooker

Complex compliance issues are driving a need for a new platform. Sungard's Protegent Compliance Platform is a comprehensive solution that addresses the challenges of managing complex compliance issues. It provides a centralized platform for managing compliance data, risk, and reporting. The platform is designed to be scalable and flexible, allowing organizations to adapt to changing regulatory requirements. It also provides a robust reporting framework, enabling organizations to generate comprehensive reports for regulatory and internal purposes.

Key findings:

- Regulatory pressure is driving a need for a new platform.
- Complex compliance issues are driving a need for a new platform.
- Sungard's Protegent Compliance Platform is a comprehensive solution that addresses the challenges of managing complex compliance issues.

THE REGULATORY PRESSURE COOKER AUSTRALIA REPORT

THE REGULATORY PRESSURE COOKER ASSESSING REGULATORY STRESS IN THE AUSTRALIAN FINANCIAL SERVICES SECTOR

KEY FINDING 1: REGULATION IS HIGH ON THE AUSTRALIAN EXECUTIVE AGENDA

Regulatory change is a constant feature of the Australian financial services sector. The report assesses the impact of regulatory change on the sector and provides insights into how organizations are responding. The findings indicate that regulation is a high priority for Australian financial services executives, with 95.1% of respondents reporting that regulation is a high priority. The report also identifies key areas of regulatory change and provides recommendations for how organizations can manage regulatory risk.

WSE UTP: EASY!

Facilitating the migration to the Warsaw Stock Exchange UTP

As the WSE rolls out its Universal Trading Platform (UTP), many market participants are still considering what architecture they will put in place and at what cost. Outsourcing market access avoids the costs associated with infrastructure, software and network connectivity, as well as the responsibilities of version upgrades, tuning and system maintenance as UTP protocols change.

SunGard has over 20 years of experience delivering ASP connectivity to global markets via the Vast Market Access service. In addition, due to our partnership with the WSE spanning more than 15 years, we are the most experienced Independent Software Vendor (ISV) in Poland with a first-rate understanding of local markets.

Our solution is fully managed, cost-effective and future-proof. Moreover, the installation of our market connectivity is seamless, and due to our extensive experience, you can be assured that the on-boarding process will be hassle- and risk-free.

SunGard facilitates UTP migrations for both equity and derivatives markets. We have successfully managed more than 40 client connections to UTP to date, and by the end of 2010 we will have migrated more than 100 WSE Euronext trading members to the UTP platform.

The connectivity, resilience and security for market access are provided by the SunGard Global Network (SGN). As a result, WSE is a single link to SGN's Warsaw Hub, not only can you access the WSE, you can also access 100+ markets around the globe.

SunGard has established relationships with exchanges all over the world, including Vienna (VSE), Deutsche Börse, Prague and Budapest.

All SunGard ASP solutions are based on our widely used trading software suite, which is also available for installation and management at clients' own premises.

About SunGard

SunGard is one of the world's leading software and technology services companies. It has more than 20,000 employees and serves 25,000 customers in 70 countries, providing software and processing solutions for financial services, higher education and the public sector. With annual revenue exceeding \$5 billion, SunGard is ranked 380 on the Fortune 500 and is the largest privately held business software and IT service company.

If you would like to know more about SunGard connectivity and ASP offerings, please contact Matthias.Loeffler@sungard.com or +49 49 7076 8420 or matthias.loeffler@sungard.com

SUNGARD GLOBAL NETWORK

With Securities

Expand your business across assets and geographies

Fixed with today's volatile market conditions in the mature markets, investors are seeking new investment opportunities to generate more alpha.

SunGard delivers Direct Market Access to over 120 equities and derivatives markets worldwide on the SunGard Global Network (SGN). We have been present in the Middle East and Africa for more than 20 years, and today we offer trading connectivity to many markets in the region, supported by offices in Dubai, Johannesburg and Tunis. A number of major financial institutions in South Africa, Egypt, Kuwait, Morocco and other countries offer DMA services for their markets through SunGard.

SGNs used by more than 2000 financial institutions in 100+ buy- and sell-sides. The network's global reach delivers access to more than 500 orders, while our advanced execution management tools will help you meet all trading opportunities.
